Phone: (555) 777-8888
Location: Seattle, WA

Summary:
Experienced Backend Developer specializing in scalable web services using Node.js and Express. Skilled in database optimization, API design, and server-side architecture for cloud-based applications.

Skills:

- Node.js, Express.js, JavaScript (ES6+)
- MongoDB, PostgreSQL, Redis
- REST API, GraphQL, WebSockets
- Docker, Kubernetes, AWS (EC2, Lambda)
- Mocha, Chai, Jest testing frameworks

Professional Experience:

Backend Developer at CloudNext | Apr 2018 – Present

- Designed and developed RESTful APIs supporting millions of monthly users.
- Improved server response time by implementing Redis caching strategies.
- Automated deployment processes with Docker and Kubernetes.
- Led migration from monolithic architecture to microservices.
- Conducted code reviews and performance profiling.

Backend Engineer at ByteWave | Jul 2015 – Mar 2018

- Developed real-time chat APIs using WebSockets.
- Created database schema designs and optimized queries.
- Built integration tests to ensure API reliability.
- Collaborated with frontend teams to define API contracts.

Education:

Bachelor of Science in Computer Science | University of Washington | 2011 – 2015

Additional Information:

- Contributor to Node.js core modules documentation.
- Regular participant in hackathons and coding challenges.
- Advocates for best practices in RESTful API design.
