Phone: (555) 444-9900
Location: Denver, CO

Summary:
Detail-oriented Backend Developer with 6 years of experience using Python and Django to build maintainable, scalable web applications. Skilled in RESTful API development, database schema design, and cloud-native deployments.

Skills:

- Python 3.x, Django, Flask
- PostgreSQL, MongoDB, Redis
- REST API design, GraphQL
- Celery, RabbitMQ, Docker, AWS (Lambda, S3, RDS)
- Unit testing with PyTest

Professional Experience:

Senior Python Developer at CloudWave Technologies | Jul 2018 – Present

- Led backend development of SaaS platform handling 500K+ active users.
- Designed asynchronous task queues with Celery for image processing and notifications.
- Migrated legacy monolithic app to microservices architecture deployed on AWS.
- Implemented GraphQL API endpoints for flexible client data queries.
- Ensured code quality via test-driven development and continuous integration.

Python Developer at NextGen Solutions | Mar 2015 – Jun 2018

- Developed RESTful APIs integrated with external payment and CRM systems.
- Created database migration scripts and schema optimization for performance.
- Maintained and extended existing Django applications for new feature requests.
- Worked in cross-functional agile teams with biweekly sprints.

Education:

Bachelor of Science in Software Engineering | Colorado State University | 2010 – 2014

Additional Information:

- Contributor to Django REST Framework open-source project.
- Speaker at PyCon 2023 on “Scaling Django Apps with Async Tasks.”
- Passionate about clean code, documentation, and software craftsmanship.
