Summary:  
Dynamic Full-Stack Developer experienced in PHP, Laravel, and modern JavaScript frameworks. Skilled in database management, API development, and frontend UI construction with Vue.js, ensuring highly interactive and user-friendly applications.

Skills:

- PHP, Laravel, Symfony
- JavaScript, Vue.js, Vuex, HTML, CSS
- MySQL, Redis, Elasticsearch
- REST API Development, OAuth 2.0
- Docker, Jenkins, AWS (EC2, RDS)

Professional Experience:

Full-Stack Engineer at Innovatech Solutions | Mar 2019 – Present

- Architected and implemented scalable backend APIs with Laravel for enterprise clients.
- Developed reactive frontend interfaces using Vue.js and Vuex.
- Optimized database queries and caching strategies for high-traffic applications.
- Automated build and deployment pipelines with Jenkins and Docker.
- Collaborated with product managers and designers to define feature requirements.

Web Developer at Digital Creations | Sep 2015 – Feb 2019

- Built custom CMS solutions using PHP and Laravel.
- Developed reusable Vue.js components and integrated APIs.
- Maintained legacy PHP applications and performed performance tuning.
- Assisted QA teams in writing test plans and debugging production issues.

Education:

Bachelor of Science in Information Technology | New York University | 2011 – 2015

Additional Information:

- Active participant in Laravel and Vue.js communities.
- Speaker at PHP NYC Meetup on “Modern PHP Development Practices.”
- Enthusiastic about scalable architecture and clean code principles.
