

Name: Frank Miller  
Role: Backend Developer

Contact:  
Email: frank.miller@example.com  
Phone: (555) 987-6543  
Location: Austin, TX

Summary:  
Experienced Backend Developer with a strong background in building scalable, secure server-side applications and RESTful APIs. Proficient in Node.js and Express.js, with expertise in database design, microservices architecture, and performance tuning.

Skills:

- Node.js, Express.js, JavaScript (ES6+)
- MongoDB, Mongoose, PostgreSQL
- REST API Design, JWT Authentication
- Docker, Kubernetes, CI/CD pipelines
- Unit Testing: Mocha, Chai, Jest

Professional Experience:

Senior Backend Developer at CloudServices Ltd. | Mar 2020 – Present

- Designed and implemented microservices handling over 10 million requests per day.
- Developed robust authentication and authorization systems using JWT and OAuth 2.0.
- Improved database query performance by optimizing indexes and schema design.
- Integrated third-party payment gateways and notification services.
- Automated deployment workflows using Docker and Jenkins pipelines.

Backend Developer at CodeFactory | Aug 2017 – Feb 2020

- Built RESTful APIs for multiple client projects, ensuring high reliability and scalability.
- Implemented data caching strategies with Redis, reducing API response times by 40%.
- Collaborated with frontend teams to define clear API contracts and documentation.
- Conducted code reviews and wrote unit/integration tests to maintain code quality.

Education:

Bachelor of Engineering in Software Engineering | University of Texas at Austin | 2013 – 2017

Additional Information:

- Contributor to several open-source Node.js middleware packages.
- Speaker at regional developer conferences on microservices and backend architecture.
- Passionate about clean code practices and continuous learning.
