Summary:
Versatile Full-Stack Developer with expertise in Python and JavaScript frameworks, creating seamless and performant web applications. Adept at both frontend UI development and backend API design, emphasizing maintainability and best practices.

Skills:
- Python, Django, Flask
- JavaScript, React, Redux, HTML5, CSS3
- PostgreSQL, MySQL
- RESTful API Development, GraphQL
- Docker, AWS (EC2, Lambda, S3)
- Agile methodologies, CI/CD

Professional Experience:
Full-Stack Developer at BrightFuture Tech | Feb 2020 – Present
- Built end-to-end web solutions with Django backend and React frontend for healthcare clients.
- Implemented responsive UI components with React and Redux for state management.
- Developed complex REST and GraphQL APIs for data-intensive features.
- Integrated third-party services for payment, authentication, and analytics.
- Participated in sprint planning, code reviews, and knowledge-sharing sessions.

Software Engineer at WebWorks Inc. | Jul 2017 – Jan 2020
- Maintained and enhanced Python/Django monolith powering B2B SaaS platform.
- Developed React components and optimized frontend performance.
- Created Dockerized development environments for consistent deployments.
- Worked closely with UX designers to improve user experience and accessibility.

Education:
Bachelor of Science in Computer Science | Northeastern University | 2013 – 2017

Additional Information:
- Contributor to open-source projects combining Django and React.
- Presented at local developer meetups on full-stack best practices.
- Passionate about mentoring junior developers and continuous learning.
