Phone: (555) 246-8101
Location: Seattle, WA

Summary:
Detail-oriented Python Developer specializing in backend web development, data analysis, and automation. Adept at creating robust APIs and complex backend logic with Django and Flask frameworks. Experienced in cloud deployments and containerization.

Skills:
- Python 3.x, Django, Flask
- RESTful API Development
- SQLAlchemy, PostgreSQL, MySQL
- Celery, Redis, RabbitMQ
- Docker, AWS (EC2, S3, RDS)
- Unit Testing with PyTest and unittest

Professional Experience:
Python Developer at DataStream Inc. | Jan 2018 – Present
- Developed scalable APIs consumed by mobile and web clients supporting 1 million+ users.
- Automated data ingestion and ETL pipelines, reducing manual workload by 75%.
- Designed task queues with Celery for background processing of time-consuming jobs.
- Containerized applications using Docker for seamless deployment and scaling.
- Collaborated with frontend developers and data scientists to deliver integrated solutions.

Junior Python Developer at SoftSolutions | Jun 2016 – Dec 2017
- Maintained legacy Django applications, improving performance and fixing bugs.
- Built RESTful services and integrated third-party APIs.
- Created unit and integration tests to ensure application stability.
- Participated in agile development processes, sprint planning, and code reviews.

Education:
Bachelor of Science in Computer Engineering | University of Washington | 2012 – 2016

Additional Information:
- Contributor to Python open-source projects related to web scraping and automation.
- Volunteer tutor for coding bootcamps and Python workshops.
- Enthusiast in machine learning and data visualization.
